

SWITCH4GOOD PODCAST

The key to living a full, healthy, and joyous life lies within the foods we eat—and our relationship to those foods. Health isn't accurately measured by the circumference of your waist or by how much you can bench press; true vitality is measured by how you feel—not just physically, but deep within.

Olympic medalist **DOTSIE BAUSCH**, together with Baywatch actress and certified health coach **ALEXANDRA PAUL**, take listeners on a transformative journey to optimal health and performance through plant-based eating.

On this riveting podcast, Dotsie and Alexandra—both of whom fought back from severe food addictions—interview expert nutritionists, pro-athletes, innovative thought-leaders, physicians, and plant-based celebrities. Through shared experiences, you'll learn how to optimize your own health and wellbeing and pave a path for a more meaningful life. So get inspired and join the **SWITCH4GOOD** revolution.

TESTIMONIALS

“These two ladies have a fun chemistry about them and are really passionate. I love the bravery of them taking on the dairy industry with the revolutionary commercial which featured 6 incredible athletes proudly saying they had “made the Switch4Good.” They are real, down to earth, and approach interviews with respect but a flair of fun.”

— SARAH

“The ability to empathetically listen to guests; the ability to distill the guest’s main premise; the ability to have an authentic conversation while carefully and sensitively guiding it along to serve the listeners can be a tightrope walk. The hosts are off to a wonderful beginning of serving a mission of help, healing, and creating something bigger than themselves. I’m excited to listen and learn.”

— ROB BROTHERS

“I made a gradual switch from an omnivore diet to vegetarian, then plant-based beginning in 2008. At the time, I didn’t even know what a vegan was. I came a long way educating myself, and yet, I have learned sooooo much more with this podcast. I can’t think of a better resource to those who need this information. This podcast is so educational and pleasant to listen to; EVERYONE should be tuned in.”
